28. Description of Change: (use additional Sheets if necessary)
A fix for NCR 19778 has been merged and built to the 4PX code baseline. However, there is no adequate test facility for this problem in the EDF. GDAAC has agreed to take a test executable for a brief period to test the fix.

29. Proposed Solution: (use additional sheets if necessary)
Back up the current version of the EcDsStFtpDisServer at Goddard; ftp the test version of the executable from Landover to Goddard; install the test executable; and test the executable. The test executable at Goddard will be rolled out (or overwritten by an official patched version) not later than the close of business on Wednesday, January 20th.

30. Alternate Solution: (use additional sheets if necessary)
Deliver the same fix in an official patch without complete testing.

31. Consequences if Change(s) are not approved: (use additional sheets if necessary)
A non-working fix may be delivered for the problem in the next patch.
